

life experience.

To me, my father is such a respectful man who gives me advices and help me with decision making. My father lives an experienced life.

When he graduated from college and works in the office room, He found it tediously sitting in the workplace all day long. And he decided quitting the job and traveling to many places.

. He quits the job and begins to traveling

My father broadened his horizon after being many places. He went home and found another job that he is fond of.

When he finally met with my mother, he believed it is time to settle down.

I 'm interested of his life experience. wondering what if I traveled together with him.

I shall meet various people not known. and experience all kinds of **cer** scenery

I want to live a life as my father does.

When time comes, I will go too.
